

Annual Report 2017-2018 now available online.

Dear Colleagues,

**Our 2017-2018 report is now available
online: http://www.cwhc-rcsf.ca/annual_reports.php**

**We invite you to take a moment to familiarize yourself
with the CWHC and our activities.**

Our annual report this year is presented as a State of Wildlife Health report that has two goals. First, it brings attention to some important wildlife health issues seen through the vantage point of our regional centres and network. While not a complete report on the status of health of all of Canada's wildlife, nor a complete inventory of all our activities, this report aims to raise

awareness among Canadians about some important aspects of their wildlife's health and encourage dialogue across the many disciplines involved in promoting, protecting and managing wildlife health. Second, it reports on the state of the CWHC programs to promote accountability and transparency in our operations.
